THAILAND AUTOMOTIVE INSTITUTE

TAI is a non-profit organization that was established according to the Cabinet resolution on September 14, 1998 as a center of automotive industry development and competitiveness enhancement in the world market.

3 Locations

Bangkok office

- o Market Research
- o Audit & Assessment
- o Human Resources Development

Samut Prakan office

o Testing R&D Center

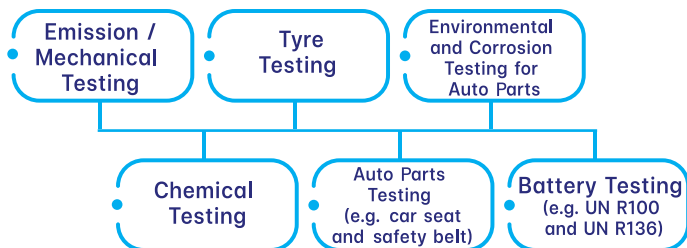

Chachoengsao office

- o Automotive and Tyre Testing, Research and Innovation Center
- o Electric Vehicle Battery Testing Center

Automotive and Auto Parts Testing Research and Development Center

1. Testing services for compulsory and international standards as well as custom-made requirements

2. Engineering Services Provide

- Testing
- Testing Design
- Consulting
- Product Development

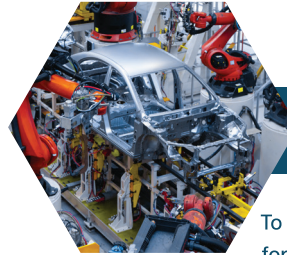

3. Support the setting of national standards by collaboration with relevant agencies

Industry and Market Intelligence Unit

This Think Tank of Thai automotive industry provides information and direction for both government agencies and entrepreneurs as well as knowledge to the public sector.

- Market Research/Study
- Policy Research
- Aviation Intelligence Unit
- Market Survey
- Automotive Intelligence Unit

Audit and Assessment

To facilitate automotive and auto parts manufacturers for industrial standard certification activities and other privilege applications

- **Inspection Body (IB)**
Provides inspection that complies with Thai Industrial Standards Institute (TISI) standards
- **Free Zone**
As appointed by the Customs Department, TAI certifies raw material production process used in vehicle production to receive privileges of tariff reduction and customs duty exemption according to Sec. 12 of the Customs Tariff Decree B.E. 2530
- **Certifying EV Auto Parts / Electric Boat**
For EV and electric boat assembly to obtain privileges of customs duty exemption

Entrepreneur / Human Resources Development

To enhance entrepreneur capability and human resources competency by providing both Public and In-house training

1. Quality Management System Related to Automotive Industry
2. Production Management
3. Problem-Solving Tools
4. Quality and Cost Reduction
5. Supervisory Skill Development
6. Mind Management
7. Skill Certification System for Automotive Industry
8. The Next Generation Automotive Technology (e.g. EV, ADAS and Carbon Neutrality)
